

## **GREEN LEKA CAN VALLDAURA**

*"At the Green Leka Can Valldaura restaurant we are a great team with ethical and evolutionary intentions, committed to healthy eating, responsible consumption, sustainability and respect for the environment."*

*Our mission, vision and values are to offer our clients a healthy raw material, betting on quality, ecological, sustainable and proximity products.*

*For this reason, among other things, we use products that are in season, we work with products free from additives, medicines and preservatives, we prioritize having products of km0, we reduce environmental impact with the majority use of bulk and plastic-free products, and we take advantage of the inevitable organic waste, to create compost for the garden, to produce our own soaps and to make animal food from our brand Circular Gos.*

*Furthermore, we select our suppliers with the requirement that they share our philosophy; committed to respect the environment and with the desire to provide healthy and quality raw material".*

**ORUJO "ESPERIT" RICE**

**CREAM OF RICE**

## **SWEET WINE**

**MOSCATEL 1,50**

## **DO YOU KNOW WHY WE DON'T HAVE FISH?**

Since 2017 we have been reducing our fish purchases until  
we decided not to buy any more....

80% of the fish we consume here in Catalonia comes from the large fishing industry that devastates in an unsustainable way all over the world, mainly in less underdeveloped countries such as Africa, this fishing not only affects the seabed and the loss of biodiversity, but also the locals who have less and less fish for their food and less work related to the sea. This has been a very important factor in immigration and the history of these immigrations you know how it is ...

And fishing in the Mediterranean is overexploited ... we are currently fishing 50% less than only 40 years ago ... besides it is the most polluted sea on the planet and add to this the high temperatures. Make numbers... if we continue like this what will happen in the next 40 years...

That is why it is very important to reduce the consumption of fish to the maximum but if you consume it that this is small and of fast reproduction and of fish markets of our coast.
